

Japan: Earthquake and Tsunami

Operations Update n° 5
Glide no. EQ-2011-000028-JPN
August 10, 2011

Period covered by this Operations Update: 29 June – 10 August 2011

Japanese Red Cross Society (JRCS) staff play musical chairs with children at Yamada Kindergarten in Iwate Prefecture. The programme, Kids Cross Project, is part of the psycho-social programme for children and it also aims at teaching children about health issues such as heat stroke through playing games. Most importantly, the programme brings back smiles to children's faces. © JRCS

Summary:

Operations Update No. 5 captures the activities of the Japanese Red Cross Society (JRCS) in response to the Great East Japan Earthquake over the past six weeks. Specifically:

- Worldwide donations continue to come into JRCS of which JPY 35 billion is international donations from sister societies.
- As JRCS has been designated the focal point for cash donations, JPY 260 billion has been transferred to 15 prefectures from the JRCS to assist disaster survivors with cash grant assistance.
- The JRCS has distributed over 79,000 appliance packages to families moving from the evacuation centres.
- To date, 817 medical teams have been mobilized from the JRCS to support the survivors of the earthquake.
- Due to the fact that the contribution from sister societies has increased significantly, JRCS is currently reviewing the action plan. The new plan will be shared with the sister societies as soon as the details are finalized within JRCS.

Background:

- On 11 March 2011 at 05:46 (UTC) Japan was struck by a magnitude 9.0 earthquake, depth 24 km, with the epicentre off its northeast (Pacific) coast. The earthquake generated a devastating tsunami, with waves estimated to reach 38 m. The consequences of the earthquake and tsunami, in terms of deaths, injuries, economic and environmental damage are still being calculated.
- Within the first five hours, the JRCS had dispatched 19 medical teams to the affected prefectures and set up its operations centre. The JRCS network of 92 Red Cross hospitals provided sites to receive patients and sites to launch mobile health teams. Psychosocial support was provided by trained staff within the evacuation centres. A family links website was established, and relief supplies were quickly dispatched.
- As a result of the main quake and of the ensuing tsunami, reactors within the Fukushima Daiichi nuclear plant were severely damaged, with consequential radiation leaks. On 12 April, the government declared the crippled Fukushima nuclear plant a level 7 on the International Nuclear and Radiological Event Scale (INES)¹, equivalent to that of the 1986 Chernobyl crisis. The government created a 20 kilometer radius exclusion zone around the plant, from which the residents have been evacuated. Additionally, the evacuation of those living within 30 km, as well as those in some sites farther out began on 15 May, with those being evacuated moving into government provided accommodations and not into evacuation centres.
- As operations continued, JRCS began receiving substantial contributions from donors, both in Japan and from abroad. Consistent with the programme for disaster management in Japan, JRCS participated in the Central Cash Distribution Committee's decision on the criteria for the first and second-round cash grant disbursement, which have now taken place.
- Collaborations within the Movement commenced almost immediately, and a Partnership Meeting was convened in Tokyo on 9 May. A plan to be taken with the National Society contributions was presented, discussed and the actions were agreed among the participating sister societies. The agreed amount for the action plan was finalized at JPY 30 billion.

The Current Situation:

As of 9 August, the number of confirmed dead was 15,687 and 4,757 were missing or unaccounted for. As of 14 July, 35,643 persons displaced by the disaster remained in evacuation centres and other temporary housing within the three worst affected prefectures (Fukushima, Miyagi, and Iwate).

On 25 July, the government enacted a JPY 2 trillion second supplementary budget for fiscal 2011 to finance disaster relief and reconstruction. Also, the government has formulated *The Basic Policy on Reconstruction* which includes the budgeting of JPY 19 trillion for the reconstruction from the 3.11 earthquake/tsunami over the next five years.

According to the Ministry of Land, Infrastructure, Transport and Tourism, 50,352 units of prefabricated houses have been completed in the three worst affected prefectures (Fukushima, Miyagi, and Iwate) and four other prefectures as of 29 July.

Japan's Ground Self-Defense Force (JGSDF) has pulled out from Iwate prefecture as of 26 July and from Miyagi prefecture on 1 August, leaving Fukushima, the only prefecture in which JGSDF operates in.

According to the Ministry of Health, Labour and Welfare, the number of people that have filed for the unemployment benefit reached nearly 142,109 as of 29 July in the three most affected prefectures alone.

On 1 August, the government announced the shipping ban of beef cattle from Fukushima followed by the same measures on the ban of beef cattle from Miyagi prefecture on 28 July, Iwate prefecture on 1 August and Tochigi prefecture on 2 August. The straw fed to the cows was found to be contaminated by radioactive cesium due to the Fukushima Daiichi Nuclear Power Plant accident.

According to the board of education of Fukushima prefecture, 14,000 or 10% of elementary and Jr. High School students will be moving out from the prefecture by the end of the summer.

¹ "Events are classified at seven levels: Levels 1–3 are 'incidents' and Levels 4–7 'accidents', IAEA, "*INES: The International Nuclear and Radiological Event Scale*", <http://www-ns.iaea.org/tech-areas/emergency/ines.asp>

According to the Ministry of Environment, the total rubble in the three worst affected prefectures amounts to approximately 22 million tons; an amount which is compiled in a decade under normal situations.

Coordination and Partnerships:

On 13 July, the delegation from the Hong Kong Red Cross: Lady Wu, Director cum Chairman of International & Relief Service Management Committee; Ms. Bonnie So, Deputy Secretary General; and Ms. Eva Lam, Senior Health Coordinator, International & Relief Services, made a visit to Ishinomaki, Miyagi prefecture. The one day field trip included a visit to Ishinomaki Red Cross Hospital, an evacuation centre and to the prefabricated houses where the household electronic appliances were installed prior to occupancy. On the morning of 19 July, JRCS headquarters welcomed Chairman Tee Tua Ba and Mr. Lim Theam Poh; Director of Operations & Head of International Services of the Singapore Red Cross Society for the signing of an MOU. Mr. Muhammad Jusuf Kalla, Chairman of the Indonesian Red Cross Society also visited JRCS headquarters in the afternoon on the same day. Mr. Kalla had presented a donation from the people of Indonesia to President Konoe.

Japanese Red Cross Action

Strong support of the sister societies has continuously been given to the Japanese Red Cross since 3.11. The JPY 30 billion relief and recovery operation plan and budget, funded by contributions from Partner National Societies, were well supported during the 9 May Partnership Meeting and the operations are in effect, accordingly.

Relief and Recovery Operation	
Programme	Activities planned
1. Distribution of emergency relief supplies (JPY 0.5 billion)	Purchase and replenishment of relief supplies
2. Emergency medical services and PSP (JPY 0.5 billion)	Deployment of medical teams
3. Rehabilitation of health infrastructure (JPY 5.0 billion)	Construction of the temporary night-time emergency medical centre Construction of temporary hospitals as secondary medical care Strengthening disaster/emergency medical capacity of Ishinomaki Red Cross Hospital Establishment of a preparedness centre for disaster medical care
4. Improving the living conditions of affected people in evacuation centres and transition shelters (JPY 19.0 billion)	Installation of water tanks for hand washing Installation of kitchen, bath and shower Installation of appliance (washing machines, TVs) at evacuation centres Creating play areas for children Distribution of electronic household appliance sets
5. Support to social welfare for the elderly and children's education (JPY 3.5 billion)	Distribution of medical/nursing beds Procurement of vehicle for social welfare institutions and municipalities Care workers deployment Educational support for children
6. Capacity building of JRCS (JPY 1.0 billion)	Strengthening disaster management capacity of the JRCS headquarters, chapters and facilities

PROGRESS TO DATE

1. Distribution of emergency relief supplies (JPY 0.5 billion)

The process for replenishment of relief supplies is in progress. The selection of the vendors for the blankets, emergency relief kits and sleeping kits will be selected by the end of the month. The delivery of the supplies is scheduled between end October and March 2012.

2. Emergency medical services and PSP (JPY 0.5 billion)

817 medical teams have been mobilized from the JRCS's nationwide network of 92 hospitals, and 79,927 patients have been treated by these teams. Two teams are currently operating in Miyagi and Fukushima, providing health services to the evacuation centres. On 29 July, JRCS has completed its mission in Iwate, handing the services over to the local medical association.

Psychological support centres have been established at the Ishinomaki Red Cross hospital in Miyagi prefecture and at the Iwate chapter in Iwate prefecture. A total of 568 staff members working within the psycho-social programme (PSP) have been deployed in the affected areas of Iwate, Miyagi and Fukushima prefecture as of 5 August. 13,604 people have benefitted from the JRCS PSP teams' support as of 24 June.

The JRCS provides medical services for the evacuees in Fukushima who make brief home visits. The evacuees often suffer from heat stroke from working in the heat and bruises from rushing home for their brief break periods.

3. Rehabilitation of health infrastructure (JPY 5.0 billion)

Construction of the temporary night-time emergency medical centre

The facility which is to be operated by the city is currently in the process of selecting a contractor. The operation of this facility is scheduled for December, this year.

Construction of temporary hospitals as secondary medical care

The local medical recovery meeting to be held at the end of August will lay out a blueprint for the medical environment of Ishinomaki. The detail planning of the construction of temporary hospitals as secondary medical care facilities will be included in this process.

As for Minamisanriku, the plan has been approved by the town council in July and will aim to start operation as of March 2012.

4. Improving the living conditions of affected people in evacuation centres and transition shelters (JPY 19.0 billion)

Installation of water tanks for hand washing

12 water tanks and taps for washing hands have been set up in nine evacuation centres around Ishinomaki area in April. The tanks and taps are generally located close to the toilets to promote proper sanitation.

Installation of appliances at evacuation centres

In addition to household appliance packages, electrical appliances, including large televisions, washing machines and hair driers, have been distributed to evacuation centres in Fukushima.

Distribution of electronic household appliance sets

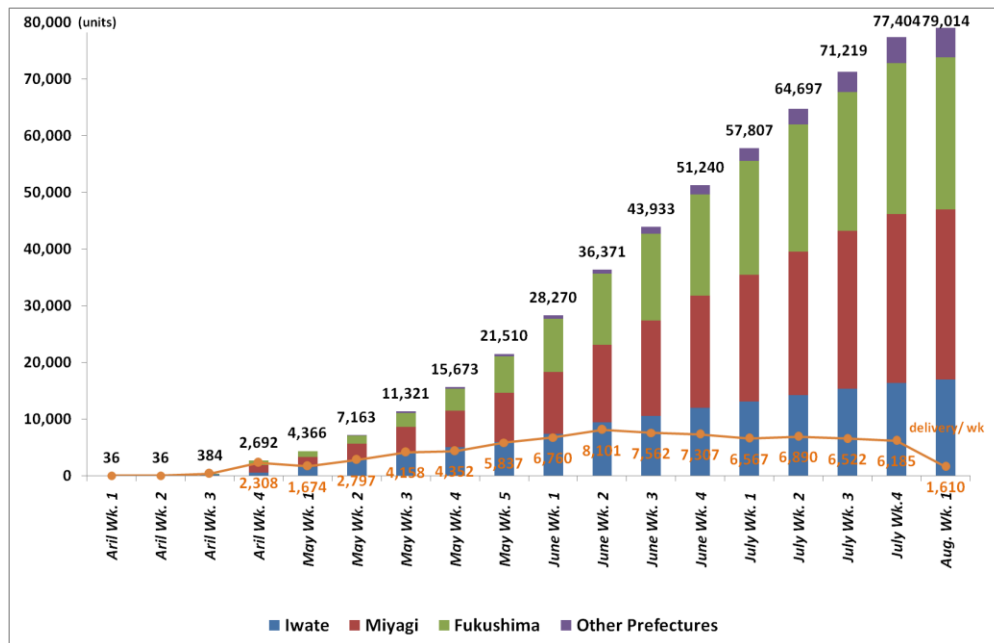

For those who were displaced from the tsunami or radiation from the nuclear power plant accident had the least amount of belongings when they moved from evacuation centres to empty prefabricated houses or temporary apartments. JRCS has been providing indispensable support for the resumption of self-reliance amongst those affected; this is a different phase from life in evacuation centres where basics living necessities were provided.

Although the number of construction of prefabricated houses has decreased from the initially envisaged 70,000 down to 51,000, JRCS remains committed to providing 90,000 household appliance packages, as the number of people who prefer to move into subsidized apartments or empty houses has dramatically increased. Out of the 90,000 sets, some 8,000 are funded by the European Commission for Humanitarian Aid (ECHO).

The status for distribution of appliance packages as of 3 August is as follows:

Location		# Distributed	Total
Iwate	Prefab Houses	12,025	16,985
	Public/private apartments	4,960	
Miyagi	Prefab Houses	16,111	29,980
	Public/private apartments	13,869	
Fukushima	Prefab Houses	10,531	26,866
	Public/private apartments	16,335	
Other Pref.	Prefab Houses	318	5,183
	Public/private apartments	4,865	
			79,014

The rate of distribution of the sets, which started at 36 sets per a week, is now at an average of a rate of 7,000 sets per week. Areas of distribution include not only the affected areas but also a wide area from Okinawa to Hokkaido, making the distribution challenging.

Summer amenity goods

The Japan Meteorological Agency announced the end of the rainy season in Tohoku as of 11 July. The extreme heat has quickly spread through the affected areas since then, making the distribution of summer amenity goods essential. As part of the effort to improve the living conditions of affected people in evacuation centres, 239,575 items were distributed throughout the three most affected prefectures. The amenity items include: cooling pads, coolers, paper fans and insect repellent.

Red Cross safety classes

In parallel to the distribution of summer amenities, Red Cross safety classes were held twice in Iwate and in Miyagi. The class content included lessons and understanding on heat stroke and the skills to prevent it.

Temporary showers

The JRCS has installed temporary showers to four evacuation centres in Iwate which were unable to receive the facilities from any other service organizations. The showers are currently scheduled to be leased until the end of August when all evacuation centres are scheduled to close.

5. Support to social welfare for the elderly and children's education (JPY 3.5 billion)

Medical/nursing beds

Due to the destruction of social welfare facilities from the earthquake/tsunami and also due to the evacuation as a result of the Fukushima Daiichi nuclear plant accident, the already existing facilities are left to accommodate an overwhelming number of elders. As of the end of July, 572 units of medical/nursing beds had been delivered in Fukushima, Miyagi and Iwate.

Vehicles for social welfare

While the procurement of vehicles for social welfare institutions and municipalities are in process, the government announced the possible compensation of social welfare vehicles and certain household goods. The municipalities are now in the process of making decisions as to whether they would want to request vehicles either from the Government or the Japanese Red Cross.

Replenishment of eleven items for school clinics

The project has been started in Miyagi. JRCS will deliver the items to 58 schools and the remaining schools will be covered by UNICEF. The eleven items include: height measurement, weight measurement, vision analyzer, occlude, sitting height measurement, hearing measurement, stretcher, bed, bedding (including mattress, futon mattress, blanket, cotton blanket, linen sheets, pillow and pillow cover), partition and fan.

Computers for Junior High Schools in Fukushima

Due to fears of nuclear radiation, children in Fukushima are now forced to stay indoors. Also, as the children from the evacuation zone have moved to other schools within the prefecture, schools that are functioning within Fukushima are now accommodating students beyond their capacity. Given such a situation, JRCS has launched a project of delivering computers to the public Junior High Schools in Fukushima. 96 computers in four schools are scheduled to be distributed by the end of August.

Care takers for the elderly

Between 31 May and 1 July, eleven teams of care takers were deployed in Iwate. The team consisted of two care takers and they mainly helped the elders during meals and bathtime.

6. Capacity building of JRCS (JPY 1.0 billion.)

The review on technical aspects of communications, water tank trucks, mobile shower facilities and other resources during and after a large scale disaster such as the Great East Japan Earthquake have started in preparation for consideration of future possible disasters.

Cash Grant Programme:

Programme	Activities planned
Assist disaster survivors with cash grant assistance to meet their immediate needs	The cash distributions are executed in accordance with the Grant Disbursement Committee's decisions and are distributed from JRCS to the prefectures' distribution committee, accordingly.

Progress to date:

As the damages and human loss from the disaster extended to 15 prefectures, the central Grant Disbursement Committee was established to determine fair allocations among these prefectures of the funds collected by the Japanese Red Cross and a few other designated fundraising organizations. JRCS has made transfers to the fifteen prefectures per the decisions of 8 April and 6 June of the central Committee. Each prefecture, in turn, established a prefectural level Grant Disbursement Committee that set criteria for eligible recipients as well as an amount of cash to be granted. Affected municipalities are actually the body on the ground that is responsible for identifying individual beneficiaries and distributing the cash.

As of 8 August, 2011, JPY 274 billion (approximately USD 3.5 billion) has been collected from national and international donor sources by JRCS (excluding that from sister societies), and approximately JPY 260 billion (approximately USD 3.3 billion) has been transferred from JRCS to 15 prefectures upon request from the prefectures. The distribution is reflected in the following chart:

as of 22 July

Prefecture	1st distribution	2nd distribution	Total
Hokkaido	3,170,000	5,722,272	8,892,272
Aomori	275,410,000	491,479,584	766,889,584
Iwate	10,435,680,000	18,955,026,000	29,390,706,000
Miyagi	39,204,680,000	70,620,784,080	109,825,464,080
Yamagata	3,390,000	6,040,176	9,430,176
Fukushima	35,045,000,000	61,163,775,888	96,208,775,888
Ibaraki	5,196,310,000	9,231,932,160	14,428,242,160
Tochigi	662,500,000	1,176,244,800	1,838,744,800
Gunma	1,610,000	2,861,136	4,471,136
Saitama	38,460,000	82,337,136	120,797,136
Chiba	1,770,060,000	4,581,368,224	6,351,428,224
Tokyo	69,060,000	122,710,944	191,770,944
Kanagawa	11,010,000	19,710,048	30,720,048
Niigata	64,480,000	114,763,344	179,243,344
Nagano	44,450,000	79,158,096	123,608,096
	92,825,270,000	166,653,913,888	259,479,183,888

Communications, Media and Public Information

The Japanese Red Cross Public Relations (PR) office launched a new English website which provides full coverage of the JRCS operations of the Great East Japan Earthquake. <http://www.jrc.or.jp/eq-japan2011/> The PR office coordinated the filming of a documentary on the JRCS operation which shows the medium- and long-term support phases of the JRCS recovery operation. The film highlights the on-going and newly emerging JRCS operations including medical assistance near the Fukushima Daiichi Nuclear Power Plant, the dispatch of instructors to run a health and psychological awareness programme in a kindergarten in Iwate prefecture, and support for elderly nursing care homes in Miyagi prefecture. The audiovisual materials will be edited and compiled as part of the JRCS annual report.

The PR office also invited the Japanese Red Cross goodwill ambassador, Ms. Norika Fujiwara, a well-known actress, to the affected areas. Ms. Fujiwara encouraged the survivors and also distributed relief items which help keep body temperatures low in the evacuation centres. This was Ms. Fujiwara's third visit to the affected areas. Overall, the interview requests from the overseas media is gradually decreasing, however, an ongoing stream of requests for interviews are coming from the BBC, National Geographic, and the media from Australia, China, Columbia, France and Indonesia.

How we work

All Japanese Red Cross and IFRC assistance seeks to adhere to the Code of Conduct for the International Red Cross and Red Crescent Movement and Non-Governmental Organizations (NGO's) in Disaster Relief and the Humanitarian Charter and Minimum Standards in Disaster Response (Sphere) in delivering assistance to the most vulnerable.

The vision of the Japanese Red Cross, as a member of the IFRC, is to inspire, encourage, facilitate and promote at all times all forms of humanitarian activities, with a view to preventing and alleviating human suffering, and thereby contributing to the maintenance and promotion of human dignity and peace in the world.

The Japanese Red Cross and IFRC's work is guided by Strategy 2020 which puts forward three strategic aims:

Save lives, protect livelihoods, and strengthen recovery from disaster and crises.

Enable healthy and safe living.

Promote social inclusion and a culture of non-violence and peace.
